Cyprus is a rich island about three-quarters the size of Connecticut and about a quarter of its inhabitants. Its population is largely Greek. It has been under British guidance though the sultan of Turkey was suscerain of Cyprus. It was almost a year ago when Great Britain declared war against Turkey that it ended that control and took possession of the island. Thus the allies are offering British territory already possessed as a price for Greek support of the country which it bound itself by treaty to aid in case of war. It is an offer which it bound itself by treaty to aid in case of war. It is an offer which cannot fail to make a strong appeal and it would not be surprising if there were further concessions which Greece

spect for other people who have a perfect right to be there, nor a proper regard for the lives of those who are involved. To all appearances there was an unwillingness to lose a second's time. There was a disposition to take every chance and it is on just such occasions that death can be anticipated with a high degree of certainty. To have slowed down one of those speeding cars, or even to have halted both of them for a minute would have been sufficient to have overcome the sad mixup. It is this insistence upon speed at any cost which is the constant cause for complaint on the highways of the country and the streets of the city, but strange as it may seem such fetalities continued.

What man is looking for is the way of progress, the way in a measure to realize the faith he has in himself and the hope he entertains for himself. He cannot find the way alone, he needs a guide-book, not a guide-book, not a guide-book that describes the scenery and notes events of the past, but one which exploits the man master of the power God has placed within him. Such a guide-book is often worth ten times its weight in gold and is to be had for a dollar. This is where a man can make his best dividend producing investment. "Health and Power Through the streets of the city, but strange as it may seem such fetalities continued."

The large number of automobiles which use the highways of the state make it necessary that every driver ment. not only should appreciate but should

The question is, is he going to remain just where he is? Worse still, will he revert to his early stages of barbarism, savagery?

Or, on the contrary, will his evolution bring him to the state of true enlightment?

What man does know is always eclipsed by what he doesn't know; and what he really knows is nothing compared with what he thinks he knows. We used to be told the earth and all things thereon were created 6,000 years ago; and now we are assured man has inhabited the earth for 15,000,000 years, that the reptiles have been doing business here for 30,000,000 years and that it took the newly evolving earth 75,000,000 years to get into condition to support living creatures. Lots of folks do not believe either statement, and no one knows which is true. It doesn't matter whether we believe it or not. Some people who cannot figure out what has been, risk their reputations upon figuring out what is to be. These know when the world is coming to an end by the signs; but all their definite dates have failed—these have all been lost in addition, subtraction and division. About the many again, need to change their minds in regard to their habitual dition, subtraction and division. About the minds in regard to their habitual dition, subtraction and division. signs; but all their definite dates have failed—these have all been lost in addition, subtraction and division. About all God ever meant a man should know in this world is how to live right, and man's lack of special interest in this has never been remarkable.

How many, again, need to change their minds in regard to their habitual sins, to come into a new attitude of hatred for them, a new resolution to banish them forever! If one has been thinking that moral evil is not so very evil after all, that wild oats are about

It was William Penn who said: "The traest end of life is to know the life that never ends!" What a difference there is between the mind which held such a picture of life and the one who pictured this world "as a vale of tears." If we intend to make the most of life, we must have a broad conception of it. It is not necessary to pray all of the as desirable a crop as good spring wheat, it is time to give up that

Thousands there are who need to change their minds about religion. Every preacher meets scores or more or less hardened sceptics. Some of them are letting some ancient and foolish prejudice shut out the whole sky of truth. Long since they made up their minds that all preachers were fakers, and religion itself an affair for invalide and old women. They closed their consideration of the case 20 years ago, and no new evidence will be admitted.

Its there not the barest possibility

Is there not the barest possibility that the sceptics may be mistaken? Might not some of them come into newnoss of life, into a larger happiness than any yet known, if by the grace of God, they could change their minds?

The picture in question, which sold for four marks, was so indistinct that faces could not be correctly distinguished. The allegation that the men Derby will be wise in extending it in the picture were not allowed to write has led thousands of women to write has led thousands of women to imagine that at last their missing relatives were located, to fancy they could make out resemblances, to revive hopes almost dead and believe that the long silence was explained by the letter prohibition and to invest past few years. It cannot go far wrong in thus facing the fire peril the letter prohibition and to invest their little savings in the photograph. The German government, finding repeated evidence that the hopes of women are being buoyed up by fancied resemblances discovered in this picture, got in touch with the French

They are now talking of a tax on incomes in excess of \$500 as means of raising money for the naval program.
